Dear Dr, «Recruiting_clinician»

As you are aware the above named patient has the condition **Primary Sclerosing Cholangitis (PSC)** or Childhood Autoimmune Liver Disease, and has consented to take part in the UK PSC-Study.

The UK PSC-Study is a scientific study to determine the genetic basis of Primary Sclerosing Cholangitis and Childhood Autoimmune Liver Disease. Begun in 2008, the study has been highly successful, recruiting over 2000 participants. This has enabled us to expand the remit of the study, to facilitate deep phenotyping for disease stratification. In order to complete this work, we are collecting clinical data about the disease course of the patients who have this condition.

The above patient has given informed consent for their clinical records to be accessed for data collection (consent form enclosed). We now need your help to collect this data. Enclosed is a Clinician Questionnaire, which we would be grateful if either your or your research nurse could complete and return to us in the prepaid envelope provided.

PLEASE: File this letter and copy of the consent form in the patient's notes. Please also file a copy of consent form in the site file. Please complete the questionnaire and send it back to us in the prepaid envelope enclosed.

If you have any questions regarding the completion of this questionnaire, please contact the UK PSC team(ukpsc@uhb.nhs.uk; tel:0121 371 8101).

«fnr»

Once again many thanks for helping us with this study.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Palak Trivedi', with a long, sweeping horizontal stroke extending to the left.

Dr Palak Trivedi
Chief Investigator – UK PSC Study
