

**UK PSC Study (including childhood AILD)**  
**Appendix B - Paediatric Participation Process – Version 2 (08.03.18)**

**Stage 1 – Identification and Recruitment**

## Stage 2 – Patient Participation

Site returns to UK PSC: samples in sample transport box; Consent form, assent form and participant questionnaire in study freepost envelope.

Site research team confirms patient name and address to UK PSC team and informs of consent and sample dispatch.

UK PSC team enters patient details onto database and creates enrolment event

UK PSC team receives samples and documents.

UK PSC Data Manager (DM) logs samples, consent, assent and questionnaire events on UK PSC database and raises any issues with site via database messaging app. DM scans and uploads consent form. NB Sites can view events on database and can print off copy of uploaded consent form.

UK PSC database sends message to site requesting completion of UK PSC Paediatric Clinician Questionnaire (v1) event.

Site logs into database and completes Paediatric Clinician Questionnaire (v1) event.

UK PSC DM checks Questionnaire (v1) event and raises any queries by messaging the site. Once all are resolved UK PSC DM changes event status to 'Checked – complete'.
